

RB-3000-PD

PORTABLE RADIATION BAR

DESCRIPTION:

The RB-3000-PD radiant bar is used to simulate the presence of hot products. For convenience the RB-3000-PD is designed to be powered by batteries instead of a cord and plug. It can be used in any conditions.

APPLICATION:

Placed on the rolling tables of a mill, the radiant bar RB-3000 allows:

- Alignment of vertical field of detection.
- Minimum and maximum horizontal limits of the field of detection.

SPECIFICATIONS:

Electrical:

- Power: 4 AA batteries.

Mechanical:

- Weight: 2 lbs (0.9 kg)
