

Cut To Length at Shear

Problem:

Variable length of products

Solution:

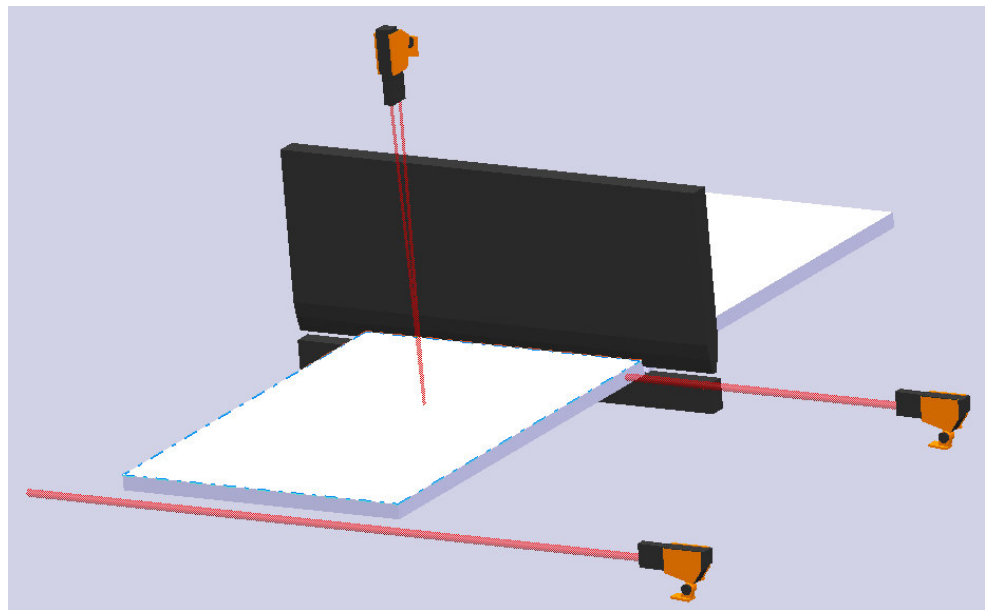

Accurate control of the product length by means of sensors

Equipment:

- LM 3000-LSV Laser Doppler Velocimeter for speed measurement
- Two OB Optical Barriers for cold product or two HMD-3000- Hot Metal Detectors for hot product

Features:

- Accuracy
- Repeatability
- Non contact
- Safety
- Easy installation and maintenance

Locations:

Plate shears or crop shears
